

Write a Program which separated vowels from lists of letters

```
In [9]: def vowels(*a):  
        its_vowel=[]  
        for i in a:  
            if i=="a" or i=="e" or i=="o" or i=="i" or i=="u":  
                print("its vowel: ", i)  
                its_vowel.append(i)  
            else:  
                print("its not a vowel: ",i)  
  
        return its_vowel
```

```
In [10]: vowels("a","e","r","s")
```

```
its vowel: a  
its vowel: e  
its not a vowel: r  
its not a vowel: s  
Out[10]: ['a', 'e']
```

```
In [ ]:
```
